

Declination

Date 2019-03-20

Latitude 35° 41' 22" N

Longitude 139° 41' 30" E

Elevation 0.0 km GPS

Model Used WMM2015

Declination 7° 35' W changing by
0° 4' W per year

Uncertainty 0° 18'

Compass shows the magnetic bearing of the
magnetic north (MN)

Magnetic declination is the angle between true north and the horizontal trace of the local magnetic field. In general, the present day field models such as the IGRF and World Magnetic Model (WMM) are accurate to within 30 minutes of arc for the declination. However, local anomalies exceeding 10 degrees, although rare, do exist.
